

Question 1

You need to implement Microsoft Business Applications along with the Microsoft Power Platform.

Which **three** Microsoft products are part of the Power platform?

Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Power Apps
- B. Azure Active Directory
- C. Power Automate
- D. Azure Machine Learning
- E. Power BI

Question 2

A company has a Power Apps app that is used by most employees. The company is expanding to other countries/regions. You need to recommend a solution to translate text generated within the Power Apps app in near real-time.

What should you recommend?

- A. Microsoft Azure Synapse Analytics
- B. Microsoft Azure Cognitive Services
- C. Microsoft Dataverse connector
- D. Power BI

B

Question 3

This question required that you evaluate the underlined text to determine if it is correct.

You have a Power Apps app. You create a new version of the app and then publish the new version. A customer goes through the process of restoring the previous version of the app. In the version tab for the app, you will see two versions of the app.

Review the underlined text. If it makes the statement correct, select 'No change is needed.' If the statement is incorrect, select the answer choice that makes the statement correct.

- A. No change is needed
- B. one
- C. three
- D. four

Question 4

HOTSPOT

You are building Power Apps app that use both Dynamic 365 Sales and Microsoft 365. For each of the following statements, select Yes if the statement is true. Otherwise, select No. Note: Each correct selection is worth one point

Hot Area:

Answer Area

Statement	Yes	No
Dynamic 365 Sales and Microsoft 365 must be in the same tenant to allow Single Sign-On (SSO).	<input type="radio"/>	<input checked="" type="radio"/>
You must download a product from AppSource to ensure that SSO works with Dynamics 365 Sales and Microsoft 365.	<input type="radio"/>	<input checked="" type="radio"/>

Question 5

HOTSPOT

You have version 1.0.0.0 of a published Power Apps app. You create and publish version 2.0.0.0 of the app. A customer goes through the process of restoring the previous version of the app.

How many versions of the app are displayed in the version tab for the app? To answer, select the appropriate option in the answer area.

Hot Area:

Answer Area

You will see 3 versions of the app.

Question 6

HOTSPOT

You are creating a Power Apps app. You want to ensure that the app can be used by individuals who have a vision impairment. For each of the following statements, select Yes if the statement is true. Otherwise, select No.

Note: Each correct selection is worth one point.

Hot Area:

Answer Area

Statement	Yes	No
Power Apps can use a screen reader without the need for a connector.	<input checked="" type="radio"/>	<input type="radio"/>
You can use an accessibility checker for Power Apps apps to check for accessibility violations and provide user interface tips.	<input checked="" type="radio"/>	<input type="radio"/>

Question 7

You are a retail director for a large clothing company. Each week you use the corporate YouTube channel to create a video that highlights new initiatives and goals for retail operations. You need to design a Power Apps app that streams the video to internal users. Which objects should you use? To answer, select the appropriate options in the answer area.

Note: Each correct selection is worth one point.

Answer Area

Action	Option
Implement the Power Apps app.	<input type="checkbox"/> Canvas <input type="checkbox"/> Model-driven <input type="checkbox"/> Portal
Use drag and drop to add a video to the app.	<input type="checkbox"/> View <input type="checkbox"/> Connector <input checked="" type="checkbox"/> Control
Implement the Power Apps app.	<input type="checkbox"/> Unified Interface <input type="checkbox"/> Control <input type="checkbox"/> Theme <input checked="" type="checkbox"/> Template

Question 8

HOTSPOT

You want to create a Power Apps app that allows you to define a custom sitemap. What should you do? To answer, select the appropriate options in the answer area.

Hot Area:

Answer Area

Navigate to the Power Apps portal and create

<input type="checkbox"/> a canvas app <input checked="" type="checkbox"/> a model-driven app <input type="checkbox"/> a portal app <input type="checkbox"/> an app by using a template

Question 9

You are a sales manager for a large retail organization.

You are creating a Power Apps app that will display customer product purchase information from your old point-of-sale (POS) system and need to link those sales to the customer accounts and product sales in Dynamic 365 Commerce.

You need to use the appropriate component

What should you use?

- A. Microsoft Dataverse
- B. Business process flow
- C. Entity metadata
- D. Business rule

Question 10

Your company has an on-premise Microsoft SQL Server database that contains legacy sales data. You must display information from the database in a new Power Apps app. You need to establish a secure connection between the database and the app. What should you use?

- A. Data source
- B. App
- C. Data gateway
- D. Power automate

Question 11

A company uses Power Apps. You need to perform administrative tasks for the company. Which admin centers should you use? To answer, drag the appropriate admin centers to the correct requirements. Each admin center may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Note: Each correct selection is worth one point.

Select and Place:

Admin centers	Answer Area	Requirement	Admin center
Azure Active Directory			Azure Active Directory
Dynamics 365 Admin center		Create user accounts for Power Apps.	
Power Apps Admin center		Assign the Environment maker role to a user.	Power Apps Admin center
Power BI Admin portal			

Question 12

A Power Apps developer has sufficient permissions to create apps, connections, and flows. The developer does not have permission needed to access company data. You need to grant the developer access to company data for an app.

Which predefined security role should you assign to the developer?

- A. Environment Maker
- B. System Customizer
- C. Microsoft Dataverse User
- D. Delegate

Question 13

HOTSPOT

A company plans to implement Power Apps.

For each of the following statements, select Yes if the statement is true. Otherwise, select No. Note: Each correct selection is worth one point.

Hot Area:

Answer Area

Statement	Yes	No
Building Power Apps apps requires proficiency in JavaScript programming.	<input type="radio"/>	<input checked="" type="radio"/>
You must select one of the app templates to create an app.	<input type="radio"/>	<input checked="" type="radio"/>

Question 14

A large retail company implements Power Apps, Microsoft Flow and the Microsoft Dataverse.

The board of directors is asking whether users are finding value in the technology. The company would like to measure and report usage of the software.

You need to recommend a tool to determine software usage.

What should you recommend?

- A. Microsoft Intune
- B. Azure Stream Analytics
- C. Power Platform Analytics
- D. Dynamics 365 Product Insights

Question 15

A company currently does not separate testing, development and production as per standard Application Lifecycle Management (ALM) protocol. The company uses Power Apps for accounting and sales processes.

The company needs to use only one login account per user. The company also must prevent development and testing from impacting production. You need to implement a solution to meet the requirements.

Which method should you select?

- A. separate environments
- B. separate tenants
- C. separate Microsoft Azure Storage Blobs
- D. separate connectors

Question 16

Your manager asks you to create a Power Platform solution for the following operations: salespeople input a customer order, the system sends an email with an invoice to the customer, adds an invoice to SharePoint, and posts a message to Microsoft Teams. Which **two** Power Platform products will you use for this solution?

- A. Power Apps
- B. Power Automate
- C. Power BI
- D. AI Builder
- E. Power Virtual Agents

Question 17

A coworker is creating an app in Power Apps and needs to automatically synchronize data from an external source. The coworker is unable to locate a suitable Microsoft approved connector template in AppSource.

You need to recommend a solution for the coworker. What should you recommend?

- A. Create a custom connector
- B. Ask the outside source to send you the data once a week
- C. Use Power Automate to connect to the database
- D. Open a ticket with Microsoft and request a new connector
- E. Use Microsoft Azure Service Bus

Question 18

HOTSPOT

Which objects should you use? To answer, select the appropriate options in the answer area.

Note: Each correct selection is worth one point.

Hot Area:

Answer Area

A Power Apps app can call a

connector
flow
gateway
solution

Actions and triggers are properties of a

connector
flow
gateway
solution

Question 19

HOTSPOT

A user is trying to understand the differences between the various ways app can be built by using Power Apps. For each of the following statement, select

Yes if the statement is true. Otherwise, select No.

Note: Each correct selection is worth one point.

Hot Area:

Answer Area

Statement

Yes

No

You can embed canvas app in model-driven apps.

A Power Apps portal can use only one data source.

You must use Power BI to create reports in model-driven apps.

Question 20

A company plans to implement Power Apps in a Power Platform environment. You need to implement other required components.

Match each option to its function. To answer, drag the appropriate option from the column on the left to its function on the right. Each option may be used once, more than once, or not at all.

Note: Each correct is worth one point.

Select and Place:

Admin centers

Microsoft Azure

Answer Area

Requirement

Implement user authentication

Admin center

Custom connector

Custom connector

Power Automate

Send date to a Microsoft OneNote notebook on the same tenant

Custom connector

Model-driven app

Canvas app

Question 21

A company is creating a canvas app to track and analyze customer visits to their retail stores. Data about customer visits is stored on-premises at each retail store location.

The app must display data about customer visits when users launch the app.

Which tool should you use?

- A. Connector
- B. Microsoft Dataverse
- C. Data Source
- D. Power Automate
- E. Data Gateway

Question 22

A toy company creates a text classification model in AI Builder to monitor customer feedback for specific keywords. When negative feedback is received for a toy, the company wants to proactively perform engineering reviews for the toy and schedule additional training sessions for workers who produce the toy.

What are two possible ways to achieve the goal? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Create a canvas app
- B. Implement the Virtual Agent
- C. Build a Power Automate Flow
- D. Use the Common Data Model

Question 23

A company plans to build canvas apps that will be used within Microsoft Teams. You need to identify the platform based on the design considerations.

To answer, drag the appropriate platforms to the correct design considerations. Each platform may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Platforms	Answer Area	Platforms
Dataverse	Design consideration Limit the number of rows to less than one million that can exist for an application in Teams.	Dataverse for Teams
Dataverse for Teams		Dataverse
	Ensure that professional developers have as many features available as possible, such as API access, plug-ins, and more, when developing applications for use within Teams.	

Question 24

A recent update has been made to a canvas app. The update causes usability issues. You need to roll back the app to a previous version.

What should you do?

- A. Restore the previous version of the app
- B. Uninstall the app for all users and reinstall by using the package from a previous version
- C. Deactivate the live app, import the previous version of the app, and then activate the app.
- D. Delete the app and create a new app based on the previous version.

Question 25

You are editing a canvas app that contains images and text. You need to add a layout control to the new page. What option on the insert tab of Power Apps Studio will you choose?

- A. Forms
- B. Media
- C. Gallery
- D. Charts
- E. AI Builder

Question 26

A user is creating their first canvas app in Power Apps.

The user does not know what types of controls they can include. You need to recommend solutions for the users.

Which types of controls should you recommend using in Power Apps? To answer, select the appropriate options in the answer area.

Note: Each correct selection is worth one point.

Hot Area:

Answer Area

View the date, time and location of upcoming internal meeting

Meeting-screen template
Gallery
List box

Create a meeting request from within the app

Meeting-screen template
Gallery
List box

Drill down into customer contact records in Dynamics 365 Sales to view a photo of a customer you are meeting.

Image
People-screen template
Add picture

Question 27

A company uses Dynamics 365 Supply Chain Management

The company wants to build customer user interfaces that add additional functionality. You need to recommend a solution for the company.

What should you recommend?

- A. Power BI
- B. Power Apps canvas apps
- C. AI Builder
- D. Power Automate

Question 28

A company uses Power Apps canvas apps.

When a user opens Power Apps Studio in a browser and selects App I can edit, they do not see an app that they need to modify. You need to determine why the user cannot see the app.

What are three possible reasons? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. The user selected an incorrect Power Apps environment
- B. The user has not been granted the System Customizer role
- C. The user has not been set as the app co-owner
- D. The app has not been shared with the user
- E. The environment does not have a Microsoft Dataverse database

Question 29

You create a model-driven app and share it with your team members.

Please select two standard security roles that you can assign to the users for access to your shared app.

- A. Environment Maker
- B. System Administrator
- C. Knowledge Manager
- D. Microsoft Dataverse User
- E. System Customizer

Question 30

You have a Microsoft Excel workbook that contains a list of tasks for a project. You store the file in OneDrive for Business. You need to create a canvas app that allows team members to update the status of their tasks.

What should you use?

- A. the Generate an app from data feature
- B. a custom action in Dataverse
- C. Power Apps Checker
- D. the Open entity data in Excel feature

Question 31

HOTSPOT

You create a canvas app by using the Generate from data feature. The app connects to a Microsoft Sharepoint list. For each of the following statements, select Yes if the statement is true. Otherwise, select No.

Note: Each correct selection is worth one point.

Hot Area:

Answer Area

Statement	Yes	No
A screen is generated that contains a browsable list of SharePoint list items.	<input checked="" type="radio"/>	<input type="radio"/>
A screen is generated that allows users to update SharePoint list items.	<input type="radio"/>	<input checked="" type="radio"/>

Question 32

A company plans to create a canvas app that connects to three databases with different proprietary database formats.

What is the minimum number of connectors required?

- A. 0
- B. 1
- C. 2
- D. 3

Question 33

A company plans to build canvas apps.

What is the minimum number of connects required? To answer, drag the appropriate number of connectors to the correct drop scenarios. Each number of connectors may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Number of connectors	Answer Area	Number of connectors
0	Scenario Synchronize data with three data sources that use different proprietary database formats.	
1	Create three Power Apps apps that each display data from a Microsoft SharePoint list.	3
2		1
3	Create three Flows that each copy data to Microsoft Azure Data Lake on different schedules.	3

Question 34

You create a Power Apps canvas app.

You need to ensure that your coworkers can run the app. What should you do?

- A. Share the app**
- B. Send the URL for the app to coworkers**
- C. Publish the app**
- D. Create a Flow for the app**

Question 35

A company uses Microsoft 365, Power Platform and Dynamics 365. You do not assign permissions to any licensed users. Users are able to create and edit Power Apps canvas apps.

In which environment are users creating and editing the apps?

- A. Production**
- B. Default**
- C. Sandbox**
- D. Developer**

Question 36

You updated your chatbox and published it again within the Power Virtual Agents app. The bot has already been exposed to five channels. Do you need to reconnect a new version of the bot with each channel?

- A. Yes**
- B. No**

Question 37

A company is creating a canvas app to display data from a legacy SQL Server database that is located on the company's internal network. You need to connect to the data. What should you use?

- A. custom connector**
- B. content pack**
- C. data gateway**
- D. Power BI**

Question 38

HOTSPOT

Instructions: For each of the following statements, select Yes if the statement is true. Otherwise, select No.

Note: Each correct selection is worth one point.

Hot Area:

Answer Area

Statement	Yes	No
You can customize buttons and menu items in canvas apps but cannot reorder the screens.	<input type="radio"/>	<input checked="" type="radio"/>
You can add sections to your canvas app forms at any time. Screens can only be added when the canvas app is created.	<input type="radio"/>	<input checked="" type="radio"/>
You can edit buttons in a Power Apps app only by using a third-party application.	<input type="radio"/>	<input checked="" type="radio"/>

Question 39

HOTSPOT

A tutoring company has developed and deployed a model-driven app for the administration staff and a canvas app for teachers.

Instructions: For each of the following statements, select Yes if the statement is true. Otherwise, select No.

Note: Each correct selection is worth one point.

Hot Area:

Answer Area

Statement	Yes	No
Teachers can access the canvas app by using desktops and mobile devices.	<input checked="" type="radio"/>	<input type="radio"/>
Only assignments of security roles are required for canvas app access.	<input type="radio"/>	<input checked="" type="radio"/>
Administration staff can create personal views and dashboards in the model-driven app.	<input checked="" type="radio"/>	<input type="radio"/>

Question 40

You are creating a canvas app that uses one connector.

Which two objects are provided by the connector? Each correct answer presents a complete solution.

Note: Each correct selection is worth one point.

- A. customizations**
- B. data sources**
- C. actions**
- D. tables**
- E. triggers**

Question 41

You complete development and testing of a new canvas app. You add users to a security team and assign the security team permissions to the app.

Users are unable to view the app.

You need to ensure that users can launch and use the app.

What should you do?

- A. Add the application to the solution**
- B. Publish the application**
- C. Share the application**
- D. Add a Power Apps Component Framework (PCF) control to the application**

Question 42

You are creating a canvas app to enable users to order tickets. You create an input field for users to input the number of tickets to order.

Users must order a maximum of four tickets and a minimum of two tickets. If a user enters a number except 2,3 or 4 the input field must display in red. If a user enters the number 2, 3 or 4, the input field must display in green.

You need to color the input field based on the user input. What should you use?

A. formula

B. gallery

C. connector

D. calculated column

Question 43

HOTSPOT

You are creating a canvas app that will be used in several countries/regions. For each of the following statement, select Yes if the statement is true. Otherwise, select No.

Note: Each correct selection is worth one point.

Hot Area:

Answer Area

Statement

Yes

No

Canvas app authoring environment will adapt to the language setting of the author.

When running a canvas app on a mobile device, the app adopts the app author's language.

Numbers and dates in Power Apps app automatically conform to the regional and language settings for a user's device.

Question 44

A company is creating a canvas app to manage weekly status reports from users about projects. Status reports must be created weekly. Users can enter project tasks with descriptions. Users can also add escalation requests for tasks that are late or at risk.

When a status report is submitted with an escalation request, the app must automatically send a text message to the submitter's manager. A reminder must be sent at 8 PM on Sunday to everyone who has not yet submitted a status report for the previous week.

You need to identify the appropriate components to use in the solution. What should you use? To answer, drag the appropriate implementations mechanisms to the correct requirements. Each implementation mechanism may be used once, more than once or not at all.

NOTE: Each correct selection is worth one point.

Select and Place:

Implementation mechanism

Answer Area

Implementation Mechanism

Actions

Actions

Implementation Mechanism

Triggers

Automatically send a text message based on the report submission

Triggers

Conditions

Automatically send a reminder at 8 PM based on a missing status report

Conditions

Business process flows

Question 45

HOTSPOT

A company is evaluating ways to connect Power Platform apps to external services to perform complex activities.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

Note: Each correct selection is worth one point.

Hot Area:

Answer Area

Statement

Yes

No

You can create a canvas app that scans and parses documents using Azure Cognitive Services and then adds the appropriate information to Dynamics 365 Sales.

You can create a canvas app that uses Azure Cognitive Services to read incident records and identify tickets that need to be escalated based on sentiment score.

Question 46

A company plans to use Power Platform to build apps which address specific business challenges. You need to recommend the appropriate types of Power Apps to use. What should you recommend?

To answer, select the appropriate options in the answer area.

Note: Each correct selection is worth one point.

Hot Area:

Answer Area

Field technicians need a mobile app to capture the location and the image of defective products.

Canvas app
Power Apps Portals
Common Data Service

Sales representative need to see different views and dashboard in the sales app.

Canvas app
Model-driven app
Power Apps Portals

Question 47

You create a model-driven app for a department.

You need to make the model-driven app available to other department members. Which two methods should you use? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. Send the application's Web URL to other team members by email
- B. Use the Share feature in the Power Apps designer
- C. Publish the app to AppSource
- D. Deploy the application to other user's instances through PowerShell

Question 48

A company uses a model-driven app for their mobile sales activities. The company wants to modify the view that is used for sales orders. You must apply a new default filter to the view. You must also modify the default sorting for sales orders. You need to make the changes to the view.

In which three locations can you make the changes? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. Power Apps site
- B. Solution Explorer
- C. Microsoft Azure DevOps
- D. App Designer
- E. Microsoft Visual Studio

Question 49

A company creates the following Microsoft Power Platform environment to manage a custom model-driven app: Development and Production. You have been granted the System Administrator security role to the development environment and a custom security role named Project Team Member to the production environment.

Answer Area

Statement	Yes	No
You will not be able to access the app until the System Administrator security role is assigned to the app in the development environment.	<input type="radio"/>	<input checked="" type="radio"/>
You can delete records in the development environment.	<input checked="" type="radio"/>	<input type="radio"/>
You will not be able to access the app until the Project Team Member security role is assigned to the app in the production environment.	<input checked="" type="radio"/>	<input type="radio"/>

Question 50

You are creating a model-driven app to track request for quotes. The app must use the following navigation structure:

Sales:

Sales Log Request for Quotes Projects Settings Customers Product Lines Sales Territories

Administration:

User Admin Users Roles

You need to create the app navigation.

Which sitemap component types should you use? To answer, drag the appropriate component types to the correct navigation elements. Each component type may be used once, more than once or not at all.

NOTE: Each correct selection is worth one point.

Select and Place:

Component types	Answer Area	Component type
Area	Navigation element	Group
Group	Administration	Subarea
Subarea	Sales log	
	Customers	Component types

Question 51

You create a model-driven app. The app is ready to be shared. You need to complete the process required to set the app up to be shared. How should you complete the process for setting up the app to be shared?

To answer, drag the appropriate setting to the correct drop targets. Each source may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Processes	Answer Area	
Select an app from the Power Apps list	Step	Process
Select the app and select a security role	1	Select an app from the Power Apps list
Select a user and choose a security role	2	Select Share
Select Share	3	Select the app and select a security role
	4	Select a user and choose a security role

Question 52

HOTSPOT

You are creating a model-driven app.

For each of the following statement, select Yes if the statement is true. Otherwise, select No.

Note: Each correct selection is worth one point.

Hot Area:

Answer Area

Statement

Yes

No

To add entities to an app, entities are dragged onto the app canvas from the component area.

View definition is created in the component area of the app designer.

You must save, validate, and publish your app for others to see the changes.

Question 53

A medical office has a model-driven app that uses Microsoft Dataverse. You plan to create a screen that allows users to capture information about doctors.

The screen must provide users the ability to enter or select the following information:

- a place to enter doctor profile data that is not part of the account table or the contact table

- a place to enter doctor's specialty in the profile form

- a column for insurance with the ability to pick one of 10 different insurance companies you need to store the captured data in Microsoft Dataverse

What should you use to store the data? To answer, drage the appropriate components to the correct requirement. Each component may be used once, more than once, or not at all.

NOTE: Each correct selection is worth one point. Select and Place:

Options	Answer Area	Requirement	Option
Table		Store additional doctor profile data	Row
Columns		Store information about the doctor's specialty	Columns
Choice		Select an insurance company	Choice
Row			

Question 54

HOTSPOT

You create a model-driven app. You need to determine which customization can be made to table forms.

For each of the following statement, select Yes if the statement is true. Otherwise, select No.

Note: Each correct selection is worth one point.

Hot Area:

Answer Area

Statement	Yes	No
A form can be made visible only to users who have been assigned a specific security role.	<input checked="" type="radio"/>	<input type="radio"/>
The label of a column on a form can be different than the column display name.	<input checked="" type="radio"/>	<input type="radio"/>
You can edit the system view named Quick Find to change the title and subtitle displayed for records in a look-up column.	<input type="radio"/>	<input checked="" type="radio"/>

Question 55

A company is building a model-driven app. You need to create and configure the objects needed for the app.

Which component categories should you use? To answer, drage the appropriate components to the correct objects. Each component may be used once, more than once, or not at all.

NOTE: Each correct selection is worth one point. Select and Place:

Component categories	Answer Area	Component category
UI	Object	Data
Data	Relationship between applications	UI
Logic	Entry forms	Logic
Visualization	Business rule process	UI
	Views to review similar information	

Question 56

You are assigning record level privileges for Power Apps and Model-Driven Apps. Which privilege should you use to ensure access for each scenario? To answer, drag the appropriate privileges to the correct requirements. Each privilege may be used once, more than once, or not at all.

NOTE: Each correct selection is worth one point. Select and Place:

Privileges	Answer Area	Requirement	Privilege
Append		Allow users to grant access to a record they own to other users.	Share
Assign		Grant ownership of a record to another user.	Assign
Share		Allow the users to associate the current record with another record.	Append

Question 57

You plan to create a model-driven app for a company that sells plants and garden suppliers. The app must meet the following requirements.

Automatically send email to a customer when a record is modified.

Ensure that all sales people follow the same steps when processing sales. You need to create Power Automate flows for the app.

Which types of flows should you create? To answer, drag the appropriate flow types to the correct requirements. Each flow type may be used once, more than once, or not at all.

NOTE: Each correct selection is worth one point. Select and Place:

Flow types	Answer Area	Requirement	Flow type
Button		Send email to customers.	Automatic
Automatic			
Scheduled		Ensure that salespeople follow the same steps.	Business Process
Business Process			

Question 58

HOTSPOT

You are designing a Power Apps solution that allows users to upload a status report directly to the company Microsoft SharePoint project management site from their mobile device.

For each of the following statement, select Yes if the statement is true. Otherwise, select No.

Note: Each correct selection is worth one point.

Hot Area:

Answer Area

Statement

You should build a model-driven app in Power Apps.

Yes

No

You should build a canvas app in Power Apps.

Users must download and run the Power Apps mobile application to use the solution.

Question 59

A company is considering implementing PowerApps to help manage business processes. Users are trying to understand the purposes and benefits of PowerApps components.

Match each benefit to its tool. To answer, drag the appropriate benefit from the column on the left to its tool on the right. Each benefit may be used once, more than once, or not at all.

NOTE: Each correct selection is worth one point. Select and Place:

Tools	Answer Area	Tool
connectors	Benefit	connectors
canvas apps	Easy data integration	
AI builder	Low code / no code across applications	AI builder
Power Automate	Easy to customize front end	
portals		canvas apps
